Personal Profile:

A strategic and people-focused leader, Andrew brings a rare blend of financial acumen, operational expertise, and leadership experience across commercial, social enterprise, and faith-based organizations. He transforms complexity, confusion and numbers into clarity, actionable plans, and sustainable results, aligning vision, governance, and operations while keeping people and purpose at the forefront. The three words that describe him best are:

Strategic → Sees the big picture, aligns finance, operations, and vision, and turns complexity into clarity.

Empathetic → Balances logic with human-centered leadership, fostering collaboration and strong team culture.

Impactful → Consistently delivers measurable results and sustainable change across diverse situations and contexts

What Andrew Does Better Than Most -his real edge:

1

Builds Clarity → Consistently turns complexity into clarity with actionable steps and strategies that deliver impact in both for-profit and social enterprise environments.

2

Brings Alignment → Builds connections between finance, operations, and people - aligning resources with strategy, and guiding teams toward shared goals.

3

Balances priorities → Unlike many peers who focus narrowly on numbers or processes, he balances logic with empathy, people with profit, reality with goals.
